Kompact 100° Boiling Water Taps

Forget waiting for the kettle to boil.

The new Kompact 3 in 1 Hot, Cold & Instant Boiling Water Tap ideal for tea, filling up pans for pasta, sterilising cooking utensils or baby bottles.

Boiling the kettle is expensive and time consuming whereas the Kompact 3 in 1 Boiling Tap provides instant boiling water costing 3p a day to run on standby.

In a marketplace where consumers want greater convenience and functionality, providing hot, cold, and 100 degrees boiling water from one tap offers a solution to every kitchen place.

It can be fitted into a new kitchen or retrospectively into your existing kitchen.

It comes with a 5.0 litre boiler designed to fit comfortably beneath a kitchen carcass behind the kick space so you do not lose storage space.

A childproof safety button on the handle has to be activated to release the boiling water ensures maximum safety.
