BOILING WATER TAPS

VESUVIUS RANGE

As the name suggests, boiling-water taps provide instant hot water without the need to switch on the kettle or boil a pan on the hob.

They can be a smart and handy solution if you want to streamline your kitchen surfaces, or find using the kettle a hassle.

A boiling-water tap is a much more permanent addition to your kitchen than a conventional kettle or plug-in hot water dispenser, as it needs to be plumbed in alongside, or instead of, your standard kitchen-sink taps.

BOILING WATER TAPS

Code: F100A
