# KlickFloor Features

## *True to Nature Design*

The wood and stone designs of the KlickFloor collection are all inspired by nature and entirely designed, developed and printed in-house. Every design has pin-sharp details, making sure your floor looks as unique as nature.

The collection ranges from pure and more pronounced woods to elegant and more distinctive stones. One by one beautifully designed, so you'll definitely find a floor that fits your expectations and interior.

## *Beautiful and realistic design is key*

Our new design floor collection is on-trend, ranging from pure and more pronounced woods to elegant and more distinctive stones. With colour variations from light to dark and everything in between.

We've improved the look of must-have oaks. We bring new wood species to the range. Our tile range now offers more options. And we introduce more 'abstract' designs to make sure that vinyl planks and tiles can stand out as a material choice with an own unique look.

For people who love to see things big, we have XL planks and tiles. And for those who prefer a more refined design is a herringbone pattern available. So there's a design floor for every style and personality. And we offer a wide variety of options to choose from.

Our *Inspiration* comes  
from you  
What you *Need*  
What you *Want*  
What you *Love*

## Luxury Vinyl Flooring

Your home, it's where you work, sleep, learn, meditate, cook, garden, work out and cool down.

It expresses who you are. Now more than ever. So why not design it that way? We couldn't agree more.

At KlickFloor, we are firm believers of self expression. It's why we design vinyl floors in the first place. Because a space that truly feels like you, begins with a floor that feels like you.

## Made to last a Lifetime

Here at KlickFloor, we stand behind the quality of our products with an unparalleled commitment: A Lifetime Warranty.

We assure you that when you choose KlickFloor, you're not just selecting flooring; you're investing in lasting quality and peace of mind.

Relax and breathe easy, made possible by our tireless innovation in scratch and stain resistance, as well as water resistance.

## 100% Belgian, 100% KlickFloor

Our flooring is designed & produced in Belgium.

Why?

So we can be in charge of the entire production process and push the boundaries of our craftsmanship.

We want to keep transportation journeys short and the footprint of our products low.

It's easier for us, better for the planet and good for you.

Made to last. On trend. And fit to match your unique way of living.

## Strong floors, Small footprint

To us, sustainability starts off with making our floors in Belgium. So we can keep a close eye on the production process and have full control over all raw materials. But that's only the beginning of the story.

We are taking concrete actions to reduce our environmental impact by 2040.

No empty statements, we just take action based on science-based facts to deliver our sustainability promise.

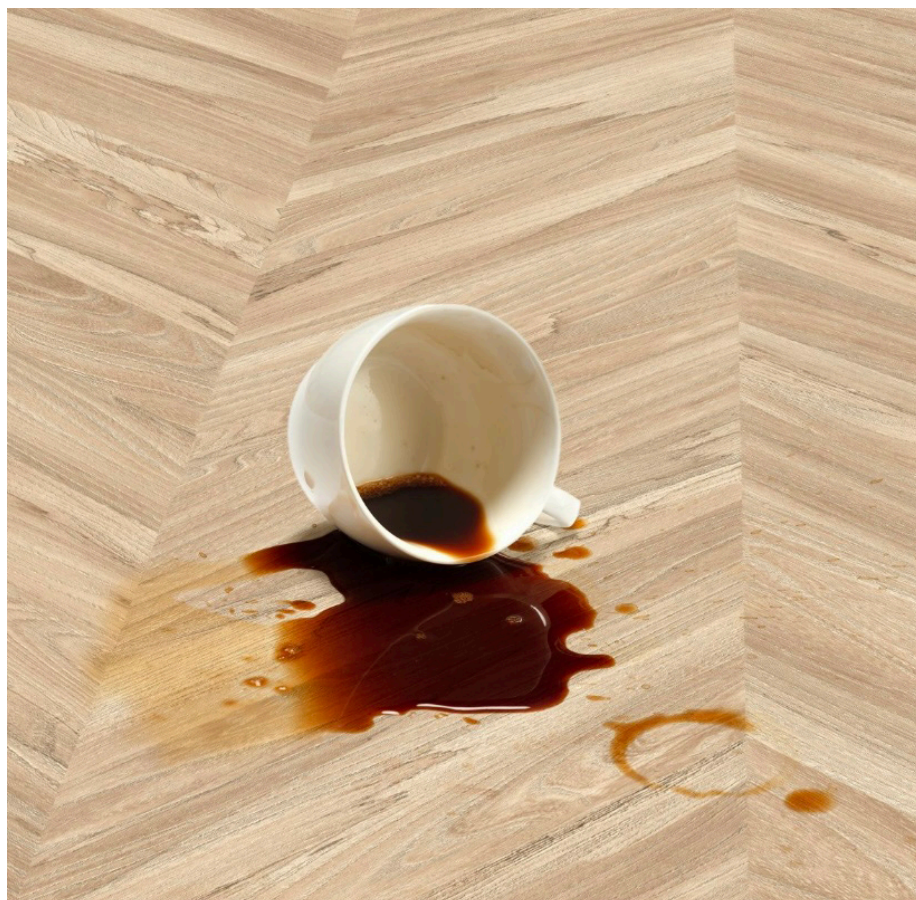

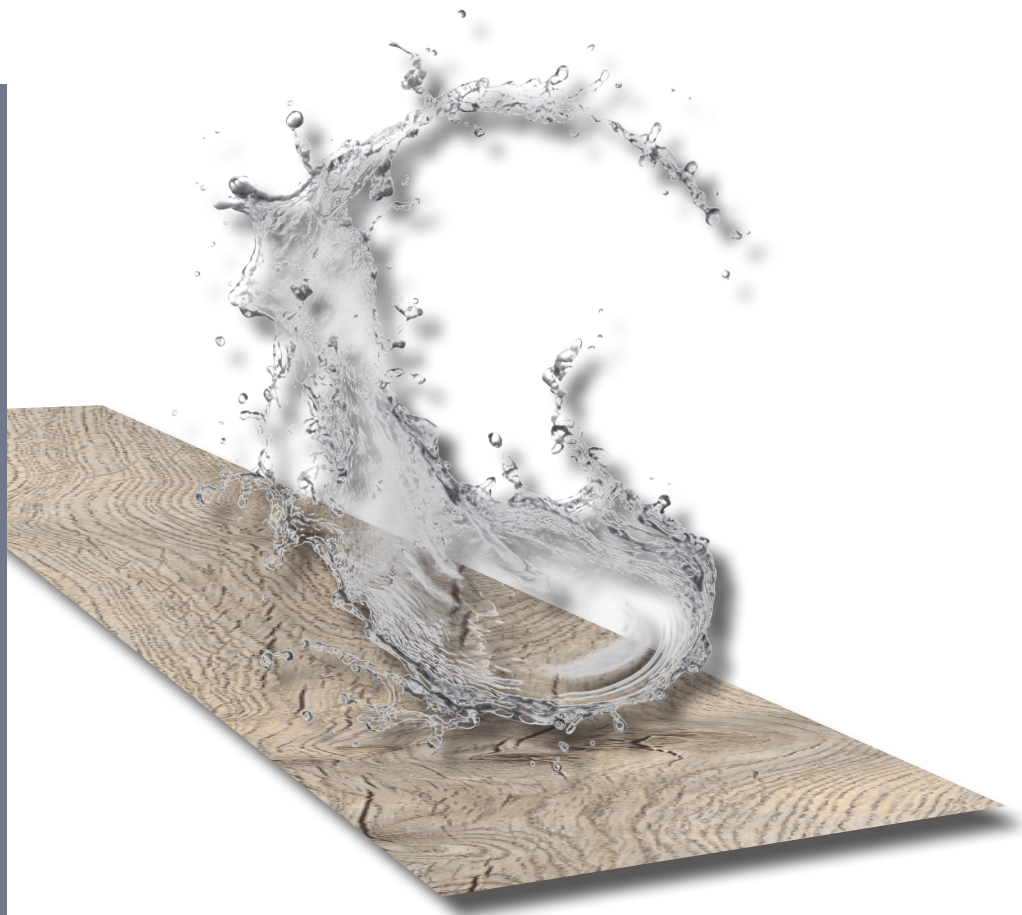

## Fully Waterproof

Vinyl repels water, making a KlickFloor floor the perfect solution for kitchens and bathrooms – and for every space at home for that matter.

Water balloon fight inside? No problem. The floor is water and slip resistant, and easy to maintain.

Did you know a KlickFloor floor is one of the most durable flooring solutions available?

The in-line calendered lamination of the different layers prevents the floor from delaminating due to moisture, so you'll enjoy the floor for years.

## Protective Top Layer & No Indentation

Your KlickFloor floor can take a beating – that's very reassuring, don't you think? It is wear, scratch and stain resistant.

The wear layer and patented Protectonite PU coating protect the design, prevent wear and limit scratches.

A KlickFloor floor can grace any place. Intensive use allowed. Even a big crowd is no problem.

Although a KlickFloor floor is resilient, it has no indentation issues. The floor returns to its original state when weight or pressure (from heels or furniture legs for example) is reduced, this is what we call the memory effect.

## Engineered with Integrated Underlay

Every vinyl floor in our ranges comes with Integrated Underlay.

This helps to simplify installation, enhance comfort and sound insulation and provides moisture protection, all whilst potentially saving time and extra cost on materials.

Integrated underlay means the underlay is already perfectly aligned with the vinyl flooring, ensuring smooth and even installation.

## Embossed in Register

As real as nature itself.

Our KlickFloor floors with Embossed in Register technology have a realistic texture that is perfectly in sync with the design.

It brings to life the smallest details and allows you to actually feel the wood grains and knots.

## *Soft & Warm*

Here at KlickFloor, we innovate with you in mind.

Without knowing it, your feeling of wellbeing increases when walking over a KlickFloor floor.

The resilient layer anticipates your body weight, offering you that soft feel underfoot. And what's more, it feels naturally warm too.

Because a KlickFloor floor has great insulating qualities, its temperature remains comfortable in every season.

## Just since the *Softness & Silence.*

## *Silent Acoustics*

One of the main benefits of a KlickFloor floor is its acoustic comfort. Vinyl is resilient, so it reduces reflective walking sound and transmission sound to a very comfortable level.

That's a valuable asset for both you and your neighbours below. If you want to avoid any annoying noises inside, KlickFloor simply offers you the ultimate flooring solution.

Do you want to please your neighbours even more? Use a KlickFloor underlay for even better transmission sound reduction.

## Design Ideas, Combine Stone & Wood

With the trend of open-plan living, creating areas with different floor designs can be a great way to give identity to different zones of an interior space.

Enjoy the warmth of wood designs in the living area and the look of stone tiles in the kitchen.

Choose within our ranges to guarantee you a compatible and seamless transition in your interior.

## XL Planks & Tiles For those who love to go big

Live spacious, and enjoy the grandeur of extra large planks and tiles.

They have the ability to make a room look so much bigger.

The laying direction of the planks and absence of grout lines between the tiles enhances the visual effect even more.

That's how much KlickFloor designs can make a difference.

# KlickFloor

*Whatever your taste, whatever your space...*

Here at KlickFloor, our aim is to offer a range suitable for any room or personal taste. Our range offers a variety of colours and finishes that will compliment any interior style. With our inspiration and solutions, we want to empower you to create your own space to suit your needs and personality.

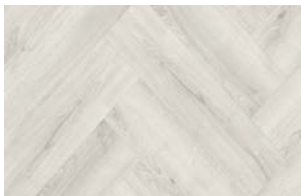

# KlickFloor *Range Overview*

*Sustainable luxury vinyl flooring, suitable for any room.*

Here at KlickFloor, our aim is to have something for everyone, no matter your taste or space. Your home, it's where you work, sleep, learn, meditate, cook, garden, work out and cool down. It expresses who you are. Now more than ever. So why not design it that way? We couldn't agree more. At KlickFloor, we are firm believers of self expression. It's why we design vinyl floors in the first place. Because a space that truly feels like you, begins with a floor that feels like you.

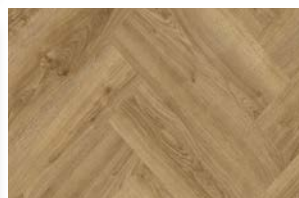

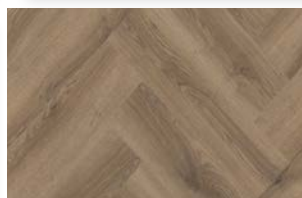

## KlickFloor *Herringbone Collection*

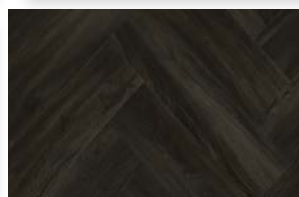

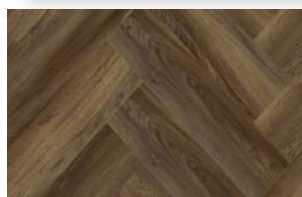

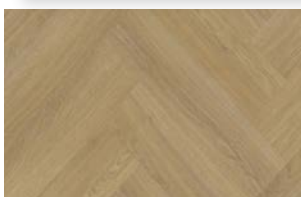

Classic *Herringbone*, brought right up to date.

Our lovely range of *Herringbone* floors combine timeless aesthetics with all the benefits of luxury vinyl, bringing a modern twist to a classic design.

To achieve the classic *Herringbone* pattern, each plank should be placed at 90 to the one next to it, creating a fish-bone like pattern, which also resembles a set of triangles or arrows.

Featuring Integrated Underlay and a Lifetime Warranty.

*Range of x8 Herringbone Styles*

## KlickFloor *RedLabel* Collection

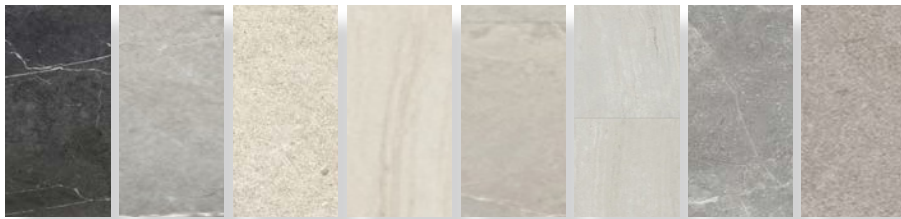

*XL Wood Planks*

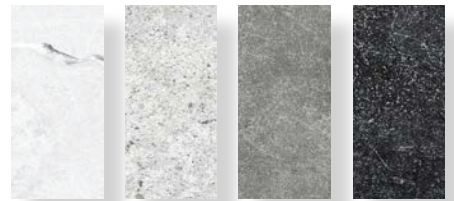

KlickFloor *RedLabel* is our most enhanced and strongest engineered vinyl floor.

The *RedLabel* Range offers a variety of Wood Planks & Tiles in both XL and Standard sizes.

Featuring Integrated Underlay and a Lifetime Warranty.

*XL Tiles*

*Standard Tiles*

## KlickFloor *BlackLabel* Collection

*XL Wood Planks*

*Standard Wood Plank*

KlickFloor *BlackLabel*: Luxury Engineered Vinyl Flooring, Cleverly Designed.

*BlackLabel* offers a range of colours, shades and designs suitable for any space or personal taste.

The *BlackLabel* Range offers a variety of Wood Planks & Tiles in both XL & Standard sizes.

*Herringbone  
Collection*

# KlickFloor *Herringbone Collection*

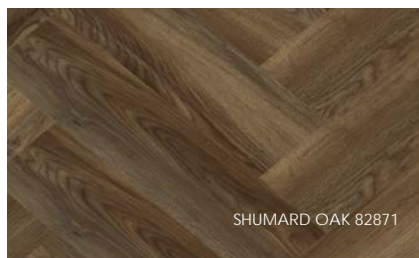

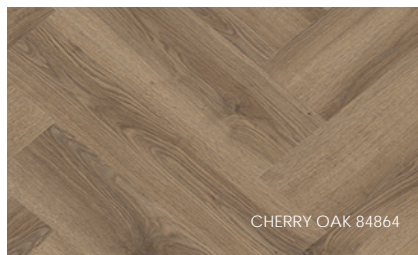

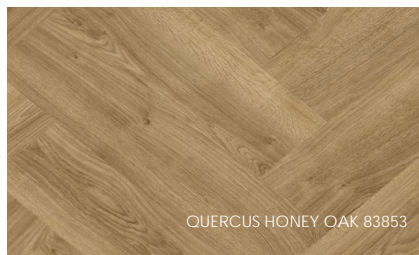

Traditional and timeless at the same time, that's how best to describe a herringbone floor.

KlickFloor vinyl herringbone flooring is a striking, eye-catching addition to your home.

With a vinyl herringbone floor from the Herringbone collection, you get the unique atmosphere of old mansions and castles. A classic floor with a modern touch, that is gaining popularity every day - therefore it has a special place in the KlickFloor range.

## *Herringbone: A classic design, reinvented*

A true classic that's been around for centuries. Its timeless feel and geometric design add a splash of grandeur and warmth to every room in your house.

## *RedLabel: The ideal floor for renovation*

*RedLabel* is our strongest engineered vinyl floor and designed to stand its ground in the most extreme conditions. The multi-layered floor – with integrated underlay – offers all the advantages of vinyl and adds strength to it. You can easily lay the 6 mm thick floor over an existing, often uneven floor, without having to break out or level it. Thanks to its strong core and integrated red underlay, *RedLabel* is able to bridge openings and unevenness in existing floors. That makes *RedLabel* the ideal floor solution for any renovation project!

## *RedLabel: Made for every room*

When you are searching for a floor, don't just decide with your eyes. Be mindful of the colour, the size, the structure, the pattern, the feeling it evokes..

## *XL Planks*

For a more grandeur interior, KlickFloor *RedLabel* Woods come as an XL plank.

XL planks have the ability to make a room look bigger. The laying direction of the planks and the absence of grout lines enhances the visual effect.

For those who love to go big... *RedLabel* XL planks can make a big difference.

### *Maintenance & Cleaning*

Take good care of your KlickFloor floor and you will enjoy it for a lifetime.

Good cleaning and proper maintenance preserve the appearance and extend the life of your KlickFloor floor. Cleaning frequency depends on how intensley the floor is used, and some other factors: how many people walk onit, how dirty the floor is and what colour it is...

KlickFloor floors are given extra protection by a TwinGuard PU protective layer on top of the resistant wear layer. The lacquer protects against dirt and makes cleaning easier.

Also, thanks to the patented Protectonite technology, your floor doesn't need pre-treatment before use.

KKXCLEANERDR

# KlickFloor Maintenance

## *Caring For Your Floor*

### *Maintaining Your Floor*

Appropriate maintenance procedures will help to preserve the appearance and will extend the life of a Kompact KlickFloor design floor. The frequency of maintenance will depend on the amount and type of traffic, degree of soiling, the floor colour and type. Kompact KlickFloor design floors have a Protectonite-PU lacquer on top of the resistant wear layer. This lacquer protects against soiling and makes overall maintenance easier. Protectonite also makes any post-treatment with protection polish unnecessary.

### *Spill & Spot Cleaning*

Spills and spots are inevitable, but they do not have to be permanent. Remove a spill quickly and there is less chance of permanent staining. First try to blot the spill with a dry cloth/ kitchen towel, then use water. Only use detergents/ cleaning products when the above is not sufficient to remove the spill/ stain.

### *Vacuuming*

Regular vacuuming is the most important part of a successful maintenance program to remove all grit, debris, and other solid particles. Vacuuming is far more effective for this type of soiling than wet mopping, which normally moves soiling from one place to another, rather than removing it.

### *Cleaning*

A common error is to use excess detergent, which then leaves a film on the surface. In this instance, clean the floor a few times without any detergent to remove the excess soap/detergent, this would bring you back to a standard condition. Care should be taken to dilute detergents in accordance with the manufacturers' recommendations.

Periodic cleaning is far more beneficial to the floorcovering than infrequent heavy or deep cleaning. However, seasonality can influence the amount of cleaning required. Once dust and debris free, with a spray, apply a solution of neutral pH cleaner to the section to be cleaned (or dependent upon the level of soiling, a light alkaline cleaner), carefully diluted to the manufacturer's instructions. Leave for enough time to react with and lift the soiling. Some agitation with a soft brush may be required.

### *External Conditions*

The appropriate management of external conditions can help to protect the flooring, which saves time and expenses on cleaning and maintenance, and also extends its lifespan. Most soiling comes from an external source and is transported indoors by foot and rolling traffic. If dirt lodges under sliding furniture, the flooring will not only be soiled but will also suffer (light) damage in the form of scratches.

### *Protection of Sliding Furniture*

Place good quality protective felt pads under chair and table legs. Furniture cups should be used to avoid high point loading.

### *Important Points*

VARIOUS KEY POINTS OF INFO:

KlickFloor must always be stored flat on an even surface to avoid damage to the joint system.

Do NOT use any rubber backed / latex mats on top of KlickFloor, to prevent plasticisation which can discolour your KlickFloor.

Do not use abrasive cleaners of any type on your KlickFloor to prevent surface scratching.

If using products with different batch numbers, please ensure that your installer mixes the tiles /planks to ensure uniformity of colour.

Always use the furniture protection pads supplied in your XtraFloor Consumer Kit to prevent damage to your KlickFloor.

Always acclimatise your KlickFloor for at least 24 hours to the room before installation

Always use an entrance mat to act as a clean-off area to protect the surface of your KlickFloor. Avoid use of rubber or latex backed mats as these may discolour your KlickFloor.

Almost all flooring will vary in colour over time when exposed to UV light. Avoid this by using curtains or blinds when the sun is very bright

Do not allow cigarettes, matches and other very hot items to contact the floor as this causes permanent damage

# KlickFloor Queries

## Frequently Asked Questions

### Questions & Answers

#### *Do I need to use underlay with KlickFloor?*

KlickFloor only recommends the use of KlickFloor XtraFloor Underlay, which has been specifically designed for use with this product. XtraFloor Underlay will always enhance the performance of your KlickFloor, providing increased comfort, sound & heat insulation and will smooth out any irregularities in your subfloor. Use of any other underlay not designed for KlickFloor may invalidate your warranty.

#### *How do I clean my KlickFloor?*

Your new KlickFloor should be swept / mopped or vacuumed regularly. Occasionally KlickFloor should be damp mopped using XtraFloor Routine cleaner. Kompact only recommend the use of KlickFloor XtraFloor Routine Cleaner & Maintainer. This will maintain the finish of your KlickFloor and maintain the SupaGuard coating on your KlickFloor. This should be supplied by your Retailer / Installer after installation or can be purchased online at [www.leakerdirect.co.uk](http://www.leakerdirect.co.uk). For heavy domestic / commercial users, a 2.5ltr container is also available. Use of any other cleaning product may invalidate your warranty.

#### *Can my KlickFloor be used with underfloor heating?*

Yes, but we recommend that KlickFloor must be acclimatised to the room and that the underfloor heating be on before and during installation (preferably around 18°C). Use of KlickFloor XtraFloor underlay will enhance the performance of your floor with underfloor heating. We do not recommend the use of any electric mat heating systems with KlickFloor.

#### *How level does my floor need to be to install KlickFloor?*

The finished appearance of your new KlickFloor will only be as good as the quality of the subfloor it is installed onto. Your installer should ensure that the subfloor has no irregularities greater than 5mm wide or 2mm deep. Use of XtraFloor underlay will smooth out small irregularities in your floor.

#### *Can I fit KlickFloor over existing ceramic tiles?*

Yes, but as above, your installer should ensure that the subfloor is suitable, and use of XtraFloor underlay will enhance the installation.

#### *How do I cut my KlickFloor?*

KlickFloor can be easily cut using a utility type knife. Once the surface is scored, a clean break snap apart.

### Troubleshooting

#### IDENTIFYING YOUR ISSUE:

#### *My KlickFloor joints are coming apart in certain areas*

This is normally caused by either an uneven subfloor or the joint system not being correctly locked on installation. Please contact your installer to rectify

#### *My KlickFloor has a 'whitish bloom' on the surface after contact with water*

This is a harmless effect caused by a reaction with water by the SupaGuard surface coating. Once the water / damp contact is removed your KlickFloor will return to normal over a period of days, as the moisture disappears.

#### *My KlickFloor is showing some scratching on the surface*

This is normal for any hard floor, and can be alleviated by use of XtraFloor Routine Cleaner to maintain the SupaGuard surface of your KlickFloor
